HIGH STRENGTH BRICK ACID

Acid Based Brick Cleaner

Description

A acid based cleaner formulated to remove unsightly stains caused by numerous every day occurrences, as well as builders splatter.

Uses

For removing cement and mortar splashes, light oil stains and grease from brickwork, paving, tiles, earthenware and concrete. Bond It **HIGH STRENGTH BRICK ACID** should not interfere with the various types of concrete and stone (except limestone and marble) commonly encountered in the general building area. Efflorescence can also be removed by using this product diluted.

Application

Gloves, overalls, boots and goggles should be worn at all times during application. Protect metal surfaces and paint-work before application with polythene sheets and tape. Remove excess dirt, mortar, etc. with a stiff yard brush. If cleaning down brickwork saturate area with water to prevent damage to mortar. Before commencing a full clean down, test on an inconspicuous area with Bond It **HIGH STRENGTH BRICK ACID** diluted 4:1, water to cleaner. For normal use dilute between 2 and 4 parts water to 1 part cleaner. Apply using a brush and allow to stand for 10-15 minutes ensuring the area does not dry out and is scrubbed occasionally with a stiff yard brush. Rinse thoroughly with large amounts of water, do not add water to neat cleaner, always add the cleaner to the water. If stains persist, repeat the process and/or use the cleaner undiluted taking care to test the neat cleaner first on an inconspicuous area. For removing efflorescence use a 8:1 dilution water to cleaner. Always use a plastic container for diluting this product.

Limitations

Do not use Bond It **HIGH STRENGTH BRICK ACID** on limestone or marble as the chemicals will attack the surface. This product can also have an adverse effect on coloured concrete, test an inconspicuous area before use. For removing mould, lichen or mildew, Bond It **MOULD AND MILDEW WASH** or **MOSS STOP!** be used. **HIGH STRENGTH BRICK CLEANER** and its fumes will attack limestone, marble stainless steel and aluminium. If used internally

extreme care should be used and thorough ventilation provided.

Storage Conditions

Store in cool, dry conditions in a sealed container between temperatures of 5 and 30°C.

Shelf Life

Up to 24 months when stored according to manufacturers instructions.

Coverage

Approximately 30-60m² per 5 Litres.

Disposal of Containers

Do not leave empty containers where residue could be harmful to children, animals or the environment. Replace lids and remove any containers to a central disposal point in accordance with local regulations.

Health & Safety

- ◆ Contains 18% hydrochloric acid.
- ◆ Irritant to eyes. Avoid contact by wearing eye and face protection. In case of contact, rinse immediately with cold, clean water for 15 minutes and seek medical attention.
- ◆ Avoid prolonged contact with skin. Wear protective clothing and gloves. Can cause severe irritation and burns on prolonged contact.
- ◆ Do not ingest. Can cause severe irritation and corrosion of the mouth, throat and digestive tract.
- ◆ Do not inhale. Will cause Irritation to the eyes, nose, throat and upper respiratory tract. Severe exposure will result in coughing, wheezing, shortness of breath, chest pain and may cause lung damage.
- ◆ Thoroughly wash hands with soap and water after use.
- ◆ Keep out of reach of children.
- ◆ Some people are more sensitive to chemical products than others. If irritation occurs discontinue use.
- ◆ See separate material safety data sheet for full handling, use and storage.

Specification Summary

Flammability	Non Flammable
Boiling Point	100°C
Solubility in water:	Soluble 20°C
Composition	18% Hydrochloric Acid

Container Sizes

Code:	BDH085
Size:	5L
